FRENCH LAW REAL ESTATE UCITS

1. FUND OBJECTIVE

The FCP's objective is to implement discretionary management to outperform, via exposure to European Union real estate shares and by reconciling financial and extra-financial performance, the FTSE EPRA / NAREIT Euro Zone Capped benchmark. Net dividends re-invested after deduction of management fees over the duration of the recommended investment period (over 5 years).

2. MANAGEMENT NOTE

Bolder still!

In January, the eurozone real estate sector contracted slightly (down 3.9%) after its record upswing during the last two months of 2023 (+30.5% from October 25), as the market readjusted its expectations as to the timing and final level of central bank rates. However, we believe the die is cast: rates will fall, and the sector will continue to recover as valuations remain undemanding!

Your Fund, down 1.6% (P share), significantly outperformed its benchmark index thanks to the massive underweighting of certain stocks compared to the index (office real estate companies Colonial, Aroundtown, Icade and Gecina) and the presence of CTP (development of major logistics assets in Central Europe) and data centre operators Digital Realty and Equinix in the portfolio.

In our view, listed real estate still harbours upside potential over the coming months. The sector will benefit from the **easing of financing conditions, which should obviously trigger an investment market revival that will at last confirm the stock market undervaluation (26% discount on average eurozone NAV 2024^e, source Kempen).** Certain sub-segments (logistics, self-storage, student housing) will also benefit from their ability to generate growth, while others (German residential in this case) will enjoy the **full effect of indexation.**

Such triggers seem to be modestly valued at 14.1 times cash flows (average eurozone 2024^e, source Kempen).

Lastly, we would remind that **any divergence from the rosy scenario** (falling inflation and continued high employment), **currently preferred by markets, would result in relatively marked outperformance by listed real estate companies,** bolstered by the combined effects of low cyclicality (long lease terms) and the increased likelihood of a drop in interest rates.

* Past performance is no guarantee of future performance.
